## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 15, 17-22, 24-29, 44, 46-51, 53-82 are allowed. They have been renumbered 1-50.

The following is an examiner's statement of reasons for allowance: Independent claims 24 and 53 establishes the limitation of said engine physical model comprising a starter motor model which provides an initial engine shaft rotational speed signal in response to an engine start control signal, an angular integrator which generates an engine shaft angle signal from said engine shaft rotational speed signal, and a spark timing model that generates said spark event output to simulate the firing of sparks at multiple shaft angles in response to said engine shaft angle signal. This limitation is neither disclosed nor suggested in the prior art of record.

Claims 29 and 58 establishes the limitation wherein said load and spark event signals are supplied to an explosion spreading model within said exhaust system model which simulates the spreading of the initial pressure wave of an ignition explosion, and only said load signal is supplied to a turbulence model that simulates constrictions and/or bends in an exhaust system waveguide, and a filtering resonance model that simulates an exhaust muffler, the output of said explosion spreading model providing an input to said turbulence model, the output of said turbulence model providing an input to said filtering resonance model, and the output from said filtering resonance model

providing said exhaust system sound signal. This limitation is neither disclosed nor suggested in the prior art of record.

Therefore, Claims 34, 29, 53, and 58 are allowed along with their dependents.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
